

STELLARIS

CONFOCAL RE-IMAGINED

Workshop:
GET CLOSER TO THE TRUTH

Join our workshop to Get Closer to the Truth with STELLARIS. During this multi-day event, you will have the opportunity to interact with STELLARIS through one-on-one **system demonstrations**. Use this opportunity to collect data and images using Leica's new cutting-edge confocal platform.

To publish cutting-edge research, you need to be able to see more, to try novel applications and to be able to collect reliable data. Our mission is to be your partner in microscopy and to empower you to drive progress in science. With the STELLARIS confocal platform, we have re-imagined confocal microscopy to get you closer to the truth when conducting research.

POWER SEE MORE

The synergy between the Power HyD detector family, optimized beam path, and White Light Lasers (WLL) empowers you to obtain more accurate and reliable data to test your hypothesis with precision.

POTENTIAL DISCOVER MORE

TauSense gives instant access to lifetime-based information, delivering additional insights to your experiments.

PRODUCTIVITY DO MORE

The ImageCompass user interface enables you to acquire images with just a few clicks, even when doing complex experiments.
